SINGLE VARIABLE CALCULUS I

INSTRUCTOR: Jaclyn Semple

OFFICE HOURS: TBD

OFFICE LOCATION: A2410

CLASSROOM: A2603

E-MAIL: jsemple@yukoncollege.yk.ca

TIME: Class: Mon/Wed/Fri, 8:30 - 10:00am

TELEPHONE: 867-456-8548

DATES: Sept 4 - Dec 20, 2019

COURSE DESCRIPTION

This is a first course in calculus. The topics include limits and continuity; the derivatives of elementary, trigonometric and logarithmic/exponential functions; applications of the derivative in solving problems and graphing; and integration of elementary and trigonometric functions. Also covered are the Mean Value Theorem and the first and second fundamental theorems of calculus.

PREREQUISITES

65% or better in either MATH 060 or MATH 12

EQUIVALENCY OR TRANSFERABILITY

UBC	Math 100 (3)	SFU	Math 151 (3)
UVIC	Math 100 (1.5)	UAF	Math 200 (3)
UAS	Math 200 (3)	URegina	Math 110 (3)
UNBC	Math 100 (3)	KWAN	Math 1120 (3)
OC	Math 112 (3)	TRU-OL	Math 1141 (3)
TRU	Math 1140 (3)	TWU	Math 123 (3)
UFV	Math 111 (3)		

For more information about transferability contact the School of Science office.

LEARNING OUTCOMES

Upon successful completion of the course, students will be able to:

- Apply the concept of the limit of a function in order to determine the continuity and end behaviour of a function.
- Establish the concept of the derivative in terms of limits and demonstrate proficiency in basic differentiation techniques, including: power rule, product rule, quotient rule, chain rule and trigonometric differentiation.
- Use graphing techniques related to differentiation and solve applied differentiation problems such as related rates and optimization.

- Apply the Fundamental Theorem of Calculus and demonstrate the relationship between the area as a limit and the definite and indefinite integral.
- Demonstrate basic integration techniques, including the antiderivative and substitution methods.
- Apply integration techniques to problems involving areas and volumes.

COURSE FORMAT

Lectures: 3 hours per week

Tutorial: 1 hour per week

The course content is covered through lectures, tutorials, and homework assignments using the prescribed textbook. Students with a sound mathematical background can expect to spend between two and four hours in preparation and study for every hour spent in class.

ASSESSMENTS:

Assignments

Problems (not graded by the instructor) will be assigned each week and solutions will be available on the course Moodle page or in the textbook.

Tutorials

Students will be given problems (not graded) to work on during the tutorial sessions.

Quizzes (30%)

There will be *around* twelve quizzes during the term, worth 30% of the final mark. Most questions on the quizzes will be drawn from the assigned problems, thus completing the assignments should guarantee good quiz results. Missed quizzes cannot be made up (unless prior arrangements have been made with the instructor), but the lowest quiz result will be discarded.

Midterm Test (30%)

There will be one midterm test worth 30% of the final mark.

Final Examination (40%)

The final examination will cover the entire course and is worth 40% of the final mark. It will be held at the end of the term sometime during the exam period (December 10 - 20). The exact date of the exam will be announced as soon as it is set by the School of Science.

EVALUATION:

Quizzes	30%
Midterm Test	30%
Final Exam	40%

TEXTBOOK AND MATERIALS

Anton H, Bivens I, Davis S. *Calculus: Single Variable*. 11th Edition. New York: Wiley, 2016. ISBN 978-1-118-88561-1 (binder-ready version)

ACADEMIC AND STUDENT CONDUCT

Information on academic standing and student rights and responsibilities can be found in the current Academic Regulations that are posted on the Student Services/ Admissions & Registration web page.

PLAGIARISM

Plagiarism is a serious academic offence. Plagiarism occurs when a student submits work for credit that includes the words, ideas, or data of others, without citing the source from which the material is taken. Plagiarism can be the deliberate use of a whole piece of work, but more frequently it occurs when students fail to acknowledge and document sources from which they have taken material according to an accepted manuscript style (e.g., APA, CSE, MLA, etc.). Students may use sources which are public domain or licensed under Creative Commons; however, academic documentation standards must still be followed. Except with explicit permission of the instructor, resubmitting work which has previously received credit is also considered plagiarism. Students who plagiarize material for assignments will receive a mark of zero (F) on the assignment and may fail the course. Plagiarism may also result in dismissal from a program of study or the College.

YUKON FIRST NATIONS CORE COMPETENCY

Yukon College recognizes that a greater understanding and awareness of Yukon First Nations history, culture and journey towards self-determination will help to build positive relationships among all Yukon citizens. As a result, to graduate from ANY Yukon College program, you will be required to achieve core competency in knowledge of Yukon First Nations. For details, please see www.yukoncollege.yk.ca/yfnccr.

ACADEMIC ACCOMMODATION

Reasonable accommodations are available for students requiring an academic accommodation to fully participate in this class. These accommodations are available for students with a documented disability, chronic condition or any other grounds specified in section 8.0 of the Yukon College Academic Regulations (available on the Yukon College website). It is the student's responsibility to seek these accommodations. If a student requires an academic accommodation, he/she should contact the Learning Assistance Centre (LAC): lac@yukoncollege.yk.ca.

TOPIC OUTLINE

Week	Content (numbers refer to textbook sections)	Assessments
1	Review: Functions, transformations, and graphing (Appendices B-E, Web Appendices F-H)	
2	Limits of algebraic functions (1.1-1.3)	Quiz 1
3	Continuity (1.5); Continuity of trigonometric functions (1.6)	Quiz 2
4	Differentiation (2.1-2.3)	Quiz 3
5	Differentiation cont'd (2.4-2.6)	Quiz 4
6	Differentiation cont'd (2.7-2.8)	Quiz 5
7	Analysis of functions and their graphs (3.1-3.2)	Quiz 6
8	Analysis of functions and their graphs cont'd (3.3)	MIDTERM
9	Applications of the derivative (3.4, 3.5)	Quiz 7
10	Integration (4.1-4.3)	Quiz 8
11	Integration cont'd (4.5, 4.6, 4.9)	Quiz 9
12	Applications of integration (5.1-5.2)	Quiz 10
13	Applications of integration cont'd (5.3-5.5)	Quiz 11
14	Review	Quiz 12

Specific dates of topic coverage and quizzes may be subject to change. Some topics may not be covered depending on time constraints.
